Raumkonzepte Peter Buchberger München

With the opening of Raumkonzepte in München, Peter Buchberger combines his expertise in architectural lighting, furnishing and art. Raumkonzepte is not only a showroom or interior studio, it's a source of inspiration and a direct reflection of years of experience and refined taste.

Peter Buchberger on the cooperation with ONE A -

"The highly modern lighting concepts support the architecture. The illumination of wall surfaces gives it texture. A room in the right light appears more valuable. A balanced lighting concept contributes to well-being. "Light and space simply belong together," he says. It's all about him. The ambience. Feeling well. The energy. The craft. Art. The staging. That's why he now relies on cooperation with ONE A".
